

2005

Statewide Preservation Program

2005

UNIFIED TRANSPORTATION PROGRAM-
Statewide Preservation Program

Blank Page

Executive Summary

The Texas Transportation Commission (commission) and the Texas Department of Transportation (TxDOT) use the Unified Transportation Program (UTP) as TxDOT's ten-year plan to guide transportation project development and construction.

To align with the budget strategies outlined in the 2003 – 2007 Strategic Plan, the department approves the UTP in two volumes:

- The Statewide Preservation Program (SPP)
- The Statewide Mobility Program (SMP)

The SPP encompasses funding strategies to maintain the existing transportation system and is part of the **Maintain It** budget strategy.

It contains funding information on two highway construction programs:

- Category 1- Preventive Maintenance and Rehabilitation
- Category 6- Structures Replacement and Rehabilitation

It also contains information on two highway maintenance-funding strategies and waterway and railroad preservation projects:

- Routine Maintenance
- Contracted Routine Maintenance
- Waterway Preservation projects
- Railroad Preservation projects

The proposed and existing programming amounts are contained on the funding distribution summary which follows. These programs and projects represent preservation efforts to maintain the existing transportation system and protect existing taxpayer investments.

INTRODUCTION

Planning for the Future

In August 2001, Texas Transportation Commission Chairman, John W. Johnson, published a report to Governor Rick Perry, the members of the Texas Legislature and all Texans, entitled "[Texas Transportation Partnerships](#)". That report established five goals to assist the department in building a new vision for Texas transportation and its infrastructure.

These goals were to provide:

- **Reliable mobility**
- **Improved safety**
- **Responsible systems preservation**
- **Streamlined project delivery**
- **Economic vitality**

Upon these goals, the [2003 – 2007 Strategic Plan](#) was developed. In an effort to streamline agency processes and make them easily understood by the public, simplified budget strategies, including outputs and efficiency measures, were proposed to the Legislative Budget Board.

These strategies include:

- **Plan It** 
- **Build It** 
- **Maintain It** 
- **Use It** 
- **Manage It** 

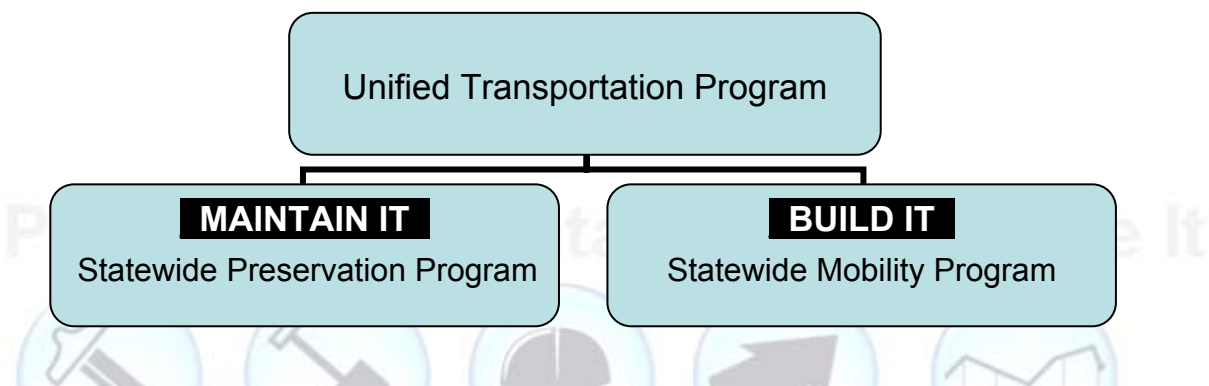

The highway programs should provide the structure to achieve many of the goals and output measures brought forward in the Texas Transportation Partnerships and the Strategic Plan.

What is the Unified Transportation Program (UTP)?

The Texas Transportation Commission ([commission](#)) and the Texas Department of Transportation (TxDOT) use the Unified Transportation Program (UTP) as TxDOT's ten-year plan to guide transportation project development and construction.

To align with the budget strategies outlined in the [2003 – 2007 Strategic Plan](#), the department approves the UTP in two volumes:

- The Statewide Preservation Program (SPP)
- The Statewide Mobility Program (SMP)

Why is the Unified Transportation Program (UTP) published?

Federal transportation legislation, such as the Transportation Equity Act for the 21st Century ([TEA-21](#)), and its predecessor, the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991, specified the transportation systems on which certain federal funds can be used and defines the role of the Metropolitan Planning Organizations ([MPO](#)) in the planning and development of projects. This Federal transportation legislation required each designated Metropolitan Planning Organization to develop a Transportation Improvement Program (TIP) and the state to compile a Statewide Transportation Improvement Program ([STIP](#)) as a condition of securing federal funds for transportation projects. The projects listed in the STIP, when approved by the Federal Highway Administration ([FHWA](#)) and the [Federal Transit Administration](#), are the only transportation projects that can utilize federal funds. (Though TEA-21 expired in October 2003 and its programs are being carried forward through continuing resolutions, the department anticipates the new transportation legislation to include the requirement of a STIP.)

Therefore, the UTP, a ten-year financial plan, and the STIP, a three-year financial plan, are used as the backbone for project development on Texas' intermodal transportation network. The UTP is the commission's mechanism to authorize project development.

MAINTAIN IT

Statewide Preservation Program (SPP)

This document encompasses funding strategies to maintain the existing transportation system and is part of the **Maintain It** budget strategy.

It contains information on two highway construction programs:

- Category 1- Preventive Maintenance and Rehabilitation
- Category 6- Structures Replacement and Rehabilitation

It also contains information on two highway maintenance-funding strategies and waterway and railroad preservation projects:

- Routine Maintenance
- Contracted Routine Maintenance
- Waterway Preservation projects
- Railroad Preservation projects

These programs and projects represent preservation efforts to maintain the existing transportation system and protect existing taxpayer investments.

BUILD IT

Statewide Mobility Program (SMP)

This document will contain information regarding the **Build It** budget strategy and contains the following highway construction categories:

- Category 2 – Metropolitan Area (TMA) Corridor Projects
- Category 3 – Urban Area (Non-TMA) Corridor Projects
- Category 4 – Statewide Connectivity Corridor Projects
- Category 5 – Congestion Mitigation and Air Quality Improvement
- Category 7 – Surface Transportation Program (STP) Metropolitan Mobility and Rehabilitation
- Category 8 – STP Safety
- Category 9 – STP Transportation Enhancements
- Category 10 – Supplemental Transportation Projects
- Category 11 – District Discretionary
- Category 12 – Strategic Priority

The SMP also contains information regarding the [Aviation](#) Capital Improvement Program and [Public Transportation](#) Programs.

What are the contents of the SPP and SMP?

The SPP and SMP contain:

- an Executive Summary;
- this introduction;
- a listing of requirements for the use of the transportation funds along with the commission's policies;
- a summary of highway construction allocation program amounts;
- listings of project-specific highway construction projects the commission has approved for construction or development;
- highway maintenance funding distributions (SPP)
- waterway and railroad preservation projects (SPP)
- Public Transportation Programs (SMP)
- and the Aviation Capital Improvement Program (SMP).

What is the difference in project-specific and allocation programs?

Allocation Programs- The allocation program is a fund management tool. The commission has delegated the responsibility for selecting projects and funds management to the lowest possible levels (the [TxDOT districts and divisions](#)). TxDOT manages most highway construction programs through allocations. Projects can be selected for development, developed and let to contract with each project's cost debited to the allocated funds available for that program. Most allocation programs consist of projects requiring relatively short development times and are intended to preserve the existing highway system. The allocation program process of developing projects allows TxDOT (both the districts and divisions) the flexibility to respond to modifications requested by the MPO and others without going back to the commission for every project change or cancellation, as long as the total allocation for that program is not exceeded.

Project-Specific Programs- the projects in these programs are listed in the UTP. The highway construction programs managed by TxDOT as project specific are major projects to improve mobility or safety. These major projects are usually associated with longer development periods; higher constructions cost and compete statewide for funds.

What does the Level of Authority mean?

Programming and Funding- An important factor in the project development and selection process is the amount of funds available to construct projects. In order for TxDOT's project development process to maintain its efficiency, projects must be selected years in advance of their actual funding and construction. A project must

pass through many development steps including: researching proposed routes; studying environmental impacts; performing engineering surveys; holding public hearings; signing agreements with the counties or cities (if needed to fulfill state or federal requirements); acquiring right-of-way; producing construction plans; and awarding construction contracts.

The actions listed above, and countless others, must occur in sequence to bring a project from an idea, to a reality. Therefore, a project must be programmed years in advance of the actual construction, to ensure that all development steps are completed at the appropriate time.

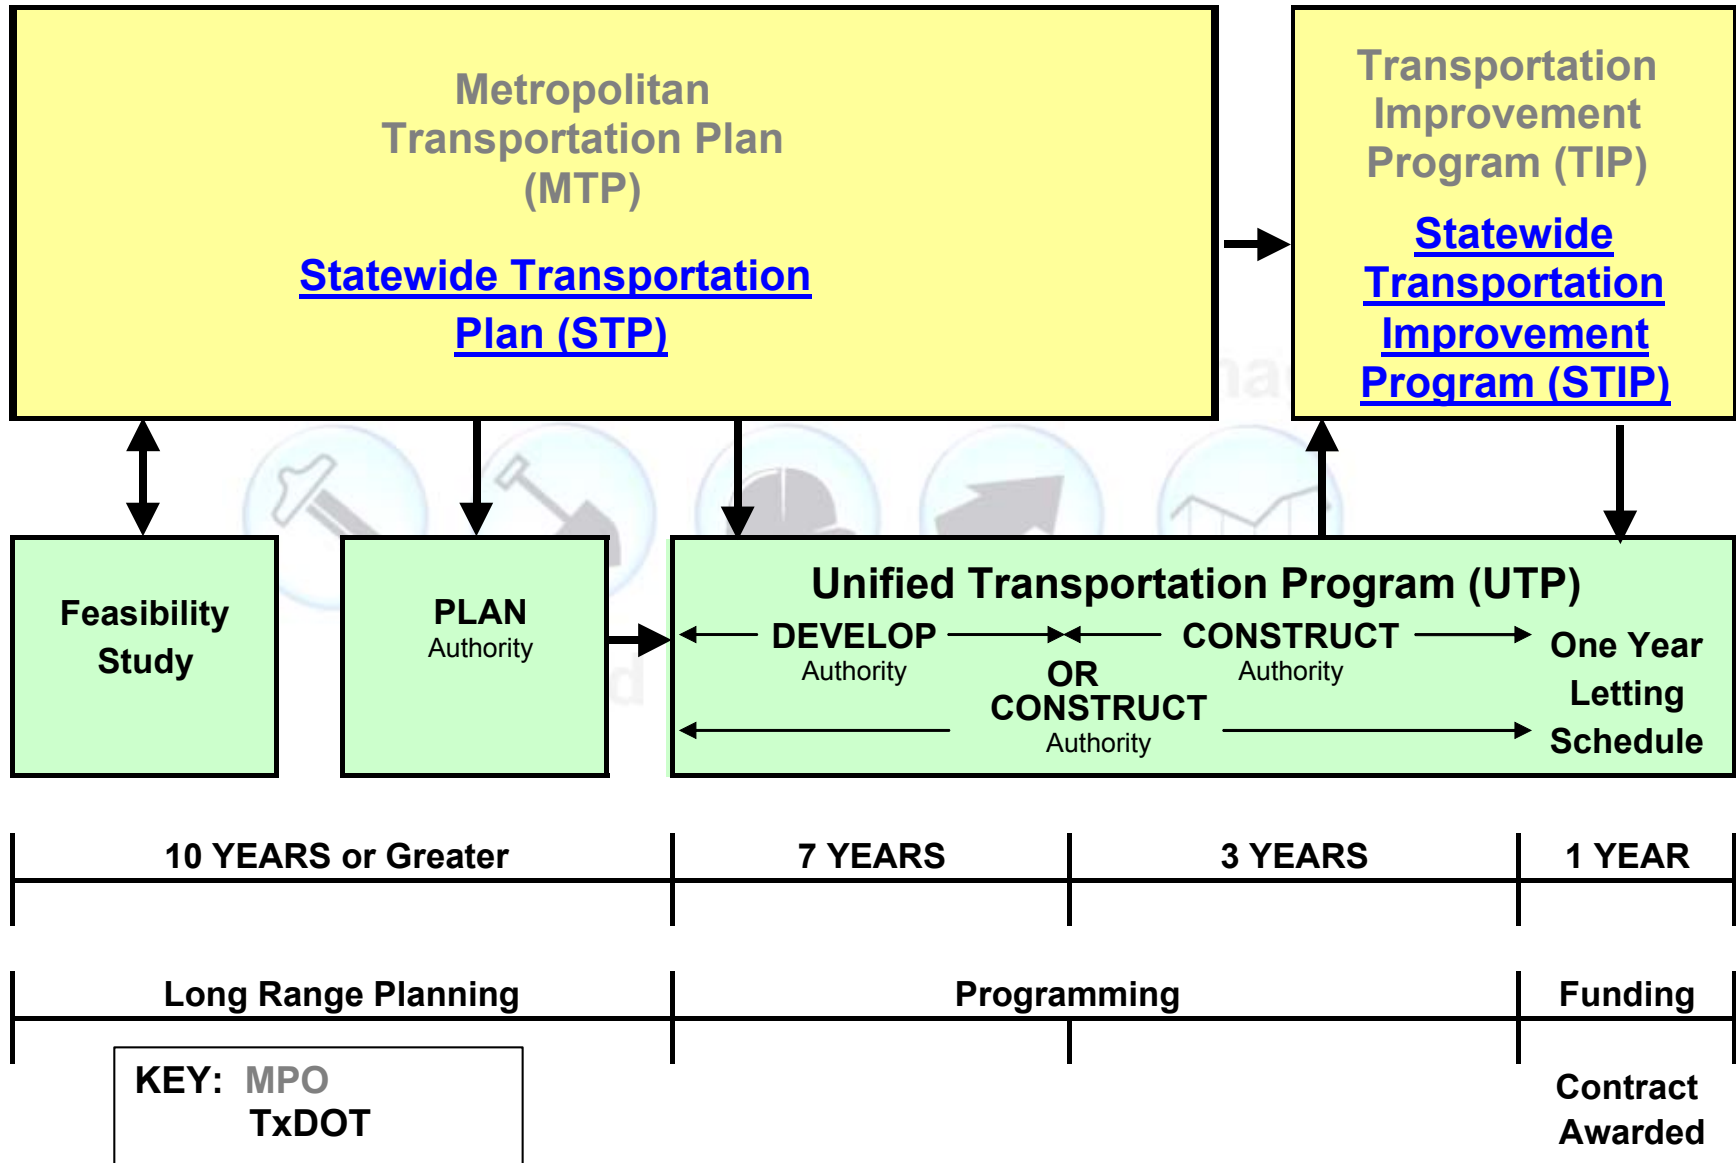

The steps required in project development have been organized into three levels of development authority listed below. The commission uses these levels of authority to authorize district resource expenditures to complete the development actions included in each level. A chart depicting the levels of authority, including approximate times allowed for each level, is located on **page VI** of this section.

PLAN (formerly Long Range Project)- Projects with this level of authority are in the initial stages of development. This development authority is reserved for mobility or other high capital cost projects where the route studies, environmental impact studies, and right of way determination can take a substantial amount of time. PLAN status authorizes the TxDOT districts to complete the necessary right of way determination including drafting the right of way map, studying routes, performing environmental impact studies, and holding public hearings. Projects with PLAN status are not listed in the UTP because their construction is planned beyond the ten years contained in the UTP.

DEVELOP (formerly Priority 2)- This level of authority authorizes the TxDOT districts to prepare the construction plans and acquire the necessary right of way. Districts should substantially complete project construction plans (geometric, structural, hydraulic and pavement design) and required right-of-way acquisition prior to moving to CONSTRUCT authority. The amount of projects in DEVELOP is constrained to **seven** years of anticipated future funding.

CONSTRUCT (formerly Priority 1)- This status authorizes the TxDOT district to complete the construction plans, perform the utility adjustments, and award a construction contract for the project in the scheduled Fiscal Year.

THE PROJECT DEVELOPMENT & PLANNING PROCESS

SUMMARY OF CATEGORIES

STATEWIDE PRESERVATION PROGRAM ([SPP](#))

MAINTAIN IT

CATEGORIES NUMBER AND NAME	PROGRAMMING AUTHORITY	USUAL FUNDING	ALLOCATION PROGRAM (Yes/No) RESPONSIBLE ENTITY	RANKING INDEX OR ALLOCATION FORMULA	BRIEF SUMMARY, RESTRICTIONS, ETC.
1 Preventive Maintenance and Rehabilitation	Commission allocation by formula. Allocation program to districts. Projects selected by districts.	Federal 90% State 10% or Federal 80% State 20% or 100% State	Yes, Districts	Preventive Maintenance ¹ 53% On-System lane miles 40% Lane miles of pavement distress scores between 70-89 5% Vehicle miles traveled per lane mile 2% Square footage of On-System Span Bridge Deck Area Rehabilitation ¹ 15% Interstate Equivalent Single Axle Loads 10% Non-Interstate National Highway System (NHS) Equivalent Single Axle Loads 5% Non-NHS Equivalent Single Axle Loads 15% On-System lane miles 5% On-System vehicle miles traveled 35% Lane miles of pavement distress scores less than 60 5% Lane miles of pavement ride scores less than 2.0 5% Area of bridge deck with Sufficiency Rating between 50 and 80 3% Centerline miles of 2 lane highways with average daily traffic (ADT) greater than 400 and pavement width less than 22 feet 2% Centerline miles of operational Intelligent Transportation System (ITS)	Preventive maintenance and rehabilitation of the existing state highway system. The rehabilitation funds may be used for rehabilitation of the Interstate Highway System main lanes, frontage roads, structures, signs, pavement markings, striping, etc. The Transportation Planning and Programming Division may approve the use of rehabilitation funds for the construction of interchanges and high occupancy vehicle (HOV) lanes on the Interstate Highway System. Rehabilitation funds may not be used for the construction of new single occupancy vehicle (SOV) lanes.

Note: ¹ A collaborative work group composed of transportation professionals from the [Association of Texas Metropolitan Planning Organizations](#), the [Texas Transportation Institute](#), the Texas Department of Transportation (TxDOT), [county judges](#) and Regional Planning Councils, recommended this formula to the Texas Transportation Commission (commission). The work group recommended averaging 3-years of pavement distress and ride scores. The commission has chosen to use the latest (1-year) of data, in order to make funding distribution decisions based on the most up-to-date information.

9 Transportation Enhancements	Commission selection and approval. Project-Specific approved by separate Minute Order.	Federal 80% State 20% or Federal 80% Local 20%	No, Commission	Committee recommendation.	Projects above and beyond what normally is expected for transportation enhancements - twelve general activities as outlined in TEA-21 . Projects recommended by local government entities, reviewed and recommended by committee, selected by Texas Transportation Commission as outlined in 43 TAC §11.204(c) .
9 Transportation Enhancements Safety Rest Area Program	Commission allocation. Statewide allocation program . Selected statewide by the Maintenance Division.	Federal 80% State 20%	Yes, Maintenance Division	Selection criteria includes: travel corridors, appropriate size and spacing of rest areas, customer desired features, and operational functions.	Funds to be used to renovate, build, and relocate safety rest areas along the state highway system. Small amount of program funds used for Safety Rest Area repairs. Other federal-aid or state funds may be used for non-qualifying repair activities.
10 Supplemental Transportation Projects - State Park Roads	Commission allocation. Statewide allocation program . Projects selected by Texas Parks and Wildlife Department (TPWD).	State 100%	Yes, Transportation Planning and Programming Division	None, Selected by TPWD	Construction and rehabilitation of roadways within or adjacent to state parks, fish hatcheries, etc. subject to Memorandum of Agreement between TxDOT and TPWD. Locations selected and prioritized by TPWD.
10 Supplemental Transportation Projects - Railroad Grade Crossing Replanking Program	Commission allocation. Statewide allocation program . Selection based on conditions of riding surface.	State 100%	Yes, Traffic Operations Division	Condition of crossing's riding surface and cost per vehicle using crossing.	Replacement of rough railroad crossing surfaces on the state highway system (approximately 140 installations per year statewide). Project selection based on conditions of the riding surface (highway, railroad and drainage) and cost per vehicle using the crossing.

UNIFIED TRANSPORTATION PROGRAM-
Statewide Preservation Program

EXHIBIT A

**HIGHWAY CONSTRUCTION PROGRAMS
POLICY AND RESTRICTIONS**

Blank Page

Category 1 Preventive Maintenance and Rehabilitation

Description

This category provides for the preventive maintenance and pavement rehabilitation on the existing State Highway System including installation and rehabilitation of traffic control devices, and the rehabilitation and maintenance of operational traffic management systems. Category 1 is intended for use in rehabilitating pavements on the state highway system.

Restrictions

Preventive Maintenance- This work is intended to preserve, rather than improve, the structural integrity of the pavement and/or structure. Examples of preventive maintenance activities include asphalt concrete pavement (ACP) overlays (2" thick maximum); seal coats; cleaning and sealing joints and cracks; patching concrete pavement; shoulder repair; scour countermeasures; cleaning and painting steel members to include application of other coatings; restore drainage systems; cleaning and sealing bridge joints; micro-surfacing; bridge deck protection; milling or bituminous level-up; clean, lubricate and reset bearings; and clean rebar/strand and patch structural concrete and seal cracks.

Rehabilitation- This category funds can be expended on any highway on the state highway system, and are intended for the rehabilitation (including approved preventive maintenance measures) of existing main lanes, structures and frontage roads.

Funds expended on the Interstate Highway system can also be used to build interchanges, high occupancy vehicle (HOV) lanes or auxiliary lanes on Interstate highways with prior approval by the Transportation Planning and Programming Division Director; however, funds cannot be used to add lanes for single occupancy vehicles (SOVs).

This category also addresses the replacement and refurbishing of signs and their appurtenances, raised reflective pavement markers and thermoplastic striping on Interstate highways.

This category is also used to address the installation and/or rehabilitation signs, pavement markings, traffic signals, and illumination systems, including minor roadway modifications to improve operations. Funds can be used to install new traffic signals as well as modernize existing signals.

This category may also be used to address the rehabilitation and maintenance of operational traffic management systems. Funds used in this manner can only be spent on contractor payments (including parts and labor) which are contracted through either the construction or General Services (ie.- catalog procurement) process. The purchase of spare parts, test equipment and other materials that will be installed by TxDOT forces are not eligible.

All projects must be developed in accordance with applicable federal and state environmental requirements. All projects must be designed, constructed, operated, and maintained in accordance with state laws, regulations, directives, safety standards, design and construction standards as required by TEA-21.

Projects in this category must have the concurrence of the MPO if it is located in their area of jurisdiction.

Category 1
Preventive Maintenance and Rehabilitation (continued)

Allocation to Districts

Allocations are approved by the commission, with the districts receiving allocations based on the following formula:

Preventive Maintenance

- 53% On-System lane miles
- 40% Lane miles of pavement distress scores between 70-89
- 5% Vehicle miles traveled per lane mile
- 2% Square footage of On-System Span Bridge Deck Area

Rehabilitation

- 15% Interstate Equivalent Single Axle Loads
- 10% Non-Interstate NHS Equivalent Single Axle Loads
- 5% Non-NHS Equivalent Single Axle Loads
- 15% On-System lane miles
- 5% On-System vehicle miles traveled
- 35% Lane miles of pavement distress scores less than 60
- 5% Lane miles of pavement ride scores less than 2.0
- 5% Area of bridge deck with Sufficiency Rating between 50 and 80
- 3% Centerline miles of 2 lane highways with Average Daily Traffic greater than 400 and pavement width less than 22 feet
- 2% Centerline miles of operational Intelligent Transportation System (ITS)

This program is managed as an **allocation program** with eligible projects developed by the districts on an as-needed basis within their allocations.

Policy

Match for preliminary engineering, construction, and right-of-way purchase/utilities will be in accordance with TxDOT's policy for Matching Funds - Participation Ratios.

Levels of Authority

CONSTRUCT – Projects authorized for complete PS&E preparation, right-of-way acquisition, utility adjustments and construction letting. (Current year plus the next three years)

Category 6

Structures Replacement and Rehabilitation

<u>Description</u>	<p>Category 6 is to address the replacement or rehabilitation of deficient existing bridges located on the public highways, roads and streets in the state and the construction of grade separations at existing highway-railroad grade crossings, and the rehabilitation of deficient railroad underpasses on the state highway system.</p>
<u>Restrictions</u>	<p>Bridge projects must meet eligibility criteria including:</p> <ol style="list-style-type: none">1. being classified as functionally or structurally deficient under FHWA criteria;2. and having a FHWA sufficiency rating less than 50 to be eligible for replacement, or having a FHWA sufficiency rating of 80 or less to be eligible for rehabilitation. <p>All bridge replacements and rehabilitation must be in accordance with TxDOT's design standards.</p> <p>The railroad grade separation projects must be at an existing highway-railroad grade crossing and replace or rehabilitate an existing deficient railroad underpass on the state highway system. The on state highway roadway must have a functional classification greater than a local road or rural minor collector.</p> <p>All projects in this category must have the concurrence of the MPO if located within their area of jurisdiction. These projects must be developed in accordance with the applicable state or federal environmental requirements. They must be designed, constructed, operated, and maintained in accordance with state laws, regulations, directives, safety standards, design and construction standards as required by TEA-21.</p>
<u>Project Selection</u>	<p>The Bridge Division ranks, prioritizes and makes project selection recommendations to the commission. The commission approves all projects for this category. On and off-state system bridge projects are selected using a statewide prioritization process that utilizes a calculated score for each candidate bridge. These score considers average daily traffic, cost per vehicle, bridge condition, adequacy of roadway width and overall bridge sufficiency. The actual scoring process is referred to as the Texas Eligible Bridge Selection System (TEBSS). However, projects involving eligible candidate bridges that are appraised by TxDOT as having a "critical condition" may be selected regardless of the TEBSS score. Projects are ranked using a statewide prioritization process that utilizes the cost-benefit index (CBI) for grade crossings and a Prioritization Score for existing underpasses. The CBI considers average daily traffic, number of fatalities and injuries, and delay to vehicle traffic. The Prioritization Score considers under passing roadway width, vertical clearance, right lateral under clearance, average daily traffic per lane, and estimated construction cost per vehicle.</p> <p>For off-state highway system bridge projects selected under the statewide prioritization process, consideration may be given under certain circumstances to a local government's preference to fund a substitution project. TxDOT staff will consider the justification of each proposed substitution on a case-by-case basis and prepare specific minute orders for commission action as appropriate.</p>
<u>Policy</u>	<p>Match for preliminary engineering, construction, and right-of-way purchase/utility adjustments will be in accordance with TxDOT's Policy for Matching Funds - Participation Ratios.</p>

Category 6
Structures Replacement and Rehabilitation (continued)

Levels of Authority

CONSTRUCT - Projects authorized for complete PS&E preparation, right-of-way acquisition, utility adjustments and construction letting. (Current year plus the next ten years).

Note: *The Bridge Division will have oversight responsibility of the bridge projects listed in Exhibit C, which includes authorizing the bridge project letting and monitoring the TxDOT districts' ability to reach the letting targets shown on the summary page of Exhibit C.*

2005

UNIFIED TRANSPORTATION PROGRAM-
Statewide Preservation Program
EXHIBIT B

**CATEGORY 1- PREVENTATIVE MAINTENANCE AND REHABILITATION
ALLOCATION PROGRAM AMOUNTS**

Blank Page

ALLOCATION PROGRAM AMOUNTS

A summary of the highway construction allocation program amounts can be found on the following pages for Category 1- Preventive Maintenance and Rehabilitation. The Texas Transportation Commission (commission) has previously authorized allocations in Fiscal Years 2005 through 2007. **The proposed Fiscal Year 2008 allocation will be approved through the minute order approving the entire FY 2005 Statewide Preservation Program.**

The program amounts shown have CONSTRUCT authority, therefore a programmed project can be let to construction as soon as the construction plans are complete, the project is listed in the Statewide Transportation Improvement Program (STIP) and listed on the approved letting schedule.

HIGHWAY MAINTENANCE BUDGET DISTRIBUTIONS

Blank Page

MAINTENANCE BUDGET DISTRIBUTIONS

A summary of the Maintenance Budget distribution amounts can be found on the following pages of this exhibit along with the distribution formulas which the [Maintenance Division](#) staff uses to calculate the distributions. These values are included for informational purposes only. The Texas Transportation Commission (commission) does not authorize these distributions or distribution formulas through the minute order process.
